U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No.

Application/Control Number: 09/132746 Page 2

Art Unit: 1771

DETAILED ACTION

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, 31-42, 54-64 drawn to Process for making or treating a fibrous material, classified in class 264, subclass 234.
 - II. Claims 20-30, 43-46, drawn to Fibrous material, classified in class 442, subclass 118.
 - III. Claims 47-53, drawn to Apparatus, classified in class 347, subclass 118.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, II, the fibrous material can be made by a materially different process other than, I, which would involve the glycol treating step is accomplished in combination with the resin.
- 3. Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has

Application/Control Number: 09/132746 Page 3

Art Unit: 1771

utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination, III, as claimed does not require the particulars of the subcombination, II, as claimed because the (ink absorbing member), fibrous material does not require the ink cartridge, apparatus. The subcombination, II, has separate utility such as an ink pad. The process for making the fibrous material I is not required to function in the Apparatus, III, since other process steps like use of the spinning oil and the use of the finishing oil can be accomplished in a different order.

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1771

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner 8. should be directed to John J. Guarriello whose telephone number is (703) 308-3209. The examiner can normally be reached on Monday to Friday from 8 am to 4 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris, can be reached on (703) 308-2414. The fax phone number for the organization where this application or proceeding is assigned is (703) 305-5408.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
